Amendments to the Specifications:

Please amend the paragraph beginning on page 14, line 22, with the following amended paragraph:

-- An interactive System for building (including saving, appending, retrieving, modifying), organising, and sharing one's own encyclopedia in one or more languages, using a computer system, wherein FIG. 1 is the diagram of the System Block consisting of different functional blocks and their interaction of the present invention. The User Interface(s) render the user's actions, and with the help of the Control System transmits the appropriate requests to the Database(s). The Control System acts as the bridge between the User Interface(s) and the Database(s). The interactive System functions with a computer system which includes one or more processors for executing commands that direct operations of the computer system and memory operatively coupled to the one or more processors.--

Please amend the paragraph beginning on page 23, line 5, with the following amended paragraph:

-- The user can further choose to Attach/Associate additional information like File(s) including Image, Animation or Sound File(s), URL(s), and Remark(s) to the Record – EXAMPLE – The user may want to Attach a File such as an Image, Animation, or a Sound file, or the user may want to Associate more information by means of associating some information that may be on a File or a Web Site, and hence the user would Associate a File or URL. The user can open and view such File(s), provided the relevant applications for opening the File(s) are installed on the user's computer system. The user's computer system, is used with the interactive system, such that the computer system's processors execute commands that direct operations of the computer system. Further, in case of a File Attachment the user can open and view the same in a separate User Interface. In case of a URL, the same would be opened by the Control System provided the user is connected to the

Internet. The user may also simply wish to Associate a REMARK to the Record. Such REMARKS are displayed to the user on demand. In case the user wants to Attach/Associate File(s), the Control System brings forth a User Interface from where the user must browse for and select the File(s), from a computer system. In case the user wants to Associate URL(s) or Remark(s), the user must enter the same into a data input field provided for the purpose. The user can further enter Remarks about each Attachment/Association in data input fields provided for the purpose. The user can further delete the Association(s) or remove the Attachment that the user might have given at this time. The Control System updates the Database(s) in this case. The user also has the further option of viewing the Attached File using the 'Zoom Attachment' option whereby the contents of the File are shown as zoomed in a separate User Interface.--
